

ADITYA VIPULBHAI SHAH

Nadiad, Gujarat, India | +91 79903 00674 | shahaditya1829@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

MCA student with hands-on experience building full-stack web applications using the MERN stack, Python, and MySQL. Skilled in database design, RESTful API development, and data analysis with Python's scientific libraries. Seeking a Software Engineer / Full-Stack Developer role to apply and grow core engineering skills.

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript

Web & MERN Stack: MongoDB, Express.js, React.js, Node.js, HTML, CSS

Data Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), Excel

Databases: MySQL, MongoDB

Tools & Platforms: Jupyter Notebook, Visual Studio Code, Git/GitHub, Postman, Streamlit

PROJECTS

Invenzaa – Medicine Inventory Management System

MERN Stack

Repository: github.com/adityashahgithub/Invenzaa

- Built a full-stack inventory management application using MongoDB, Express.js, React.js, and Node.js.
- Implemented role-based authentication and authorization to secure access across user types.
- Designed dashboards for stock monitoring, sales tracking, expiry management, and inventory analytics.
- Developed RESTful APIs to manage medicines, suppliers, purchases, and transactions.
- Integrated real-time stock alerts and batch tracking to support inventory accuracy.

FiscalPoint – Financial Management System

Python, PHP, MySQL, HTML, CSS, JavaScript

Repository: github.com/adityashahgithub/FiscalPoint

- Built a web-based financial management system supporting income, expense, budget, and savings tracking.
- Designed a secure MySQL database schema for user authentication and financial records.
- Created interactive dashboards and reports to support financial decision-making.
- Integrated data visualization features to present financial trends clearly to end users.

Hyundai Website Clone

HTML, CSS, JavaScript, Bootstrap

Repository: github.com/adityashahgithub/Hyundai-Website

- Built a responsive website clone using HTML, CSS, JavaScript, and Bootstrap.
- Developed reusable UI components including navigation bars, image sliders, and vehicle showcase sections.
- Implemented responsive layouts tested across desktop, tablet, and mobile breakpoints.

TRAINING

Data Science and Machine Learning Training Program – Teachnook, Bengaluru

May 2024 – June 2024

- Completed hands-on training in machine learning workflows and data analysis techniques.
- Built predictive models and visualized results using Python.
- Applied ML workflows to real-world datasets through mini projects.

EDUCATION

Dharmsinh Desai University (DDU), Nadiad

Aug 2025 – Present

Master of Computer Applications | Current CPI: 7.98

Charotar University of Science and Technology, Changa

Aug 2022 – Apr 2025

Bachelor of Science in Information Technology | CGPA: 8.11
